### CHILD'S CASE HISTORY

Forgine joined our care program on 19<sup>th</sup> September 2009 as was requested by his Aunt. The mother died due to cancer disease after her operation during giving birth to Bathy.

The father of Fogine is also sick from the incurable injuries sustained as a result of tribal war in 2008. The father can't walk by himself nor be able to raise food for the child. The father also needs a help due to his disease. Fogine has no brother or a sister.

We received Fogine into our care program with love and he is now getting happy and he has a good health. He is a Seven years old child. He has attended in school and he is in a Grade One this year 2014.

We invite you friends to pray for Fogine and may God speak to you for Fogine's life, so we invite you to become as a sponsor into Fogine's life. Welcome.
